

**Reach**

Dear Sir, Madam,

Thank you for your interest in our products. We are pleased to respond to your inquiry as follows.

Chemicar Europe NV is from a REACH point of view known as a so called 'Down Stream User'.

This means, although we are using chemical substances in the production of our products we are not in charge of their registration. The registration of a substance is the responsibility of its producer(s) and/or importer(s).

After thoroughly checking with our suppliers we can confirm that all materials used in our formulations are either already listed, intended to be listed or are not needed to be listed.

If we can be of any further assistance please feel free to contact us, we are anytime at your disposal.

Carlo Cervetti  
Product Manager
